

Anemone Fish Aquarium

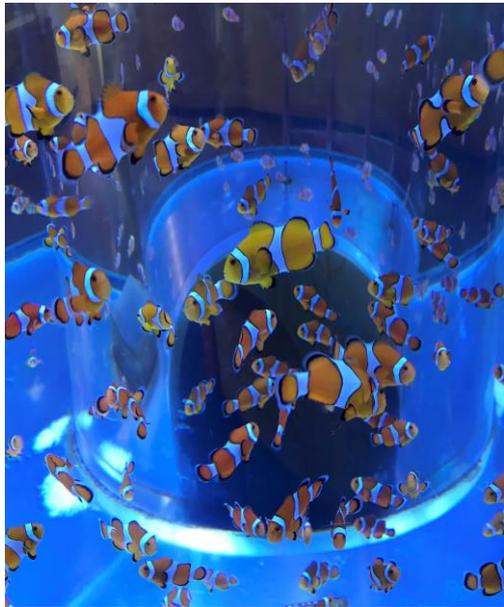

There are 30 kinds of anemone fish in the world and you can see 20 kinds of anemone fish in Tokai Aquarium. Tokai Aquarium is for the first time bred of anemone fish in Japan. Now 14 kinds of baby anemone fish in this aquarium.

Anemone Fish are bred behind the tanks and you can see them. They look like *Aplocheilus latip*, but 20 days after they are born they change to look like anemone fish.

This section of the Marine Science Museum English floor plan was made by Takahashi Keiichi, Kawaguchi Yuichiro, Tanaka Ryoga, Ishiyama Ryota and Awamura Mizuki.

The center of anemonefish aquarium, there is the water tank that you can go inside as it has a viewing bubble. The tank is like a tunnel, so you can go inside. However, you need to be careful of your head because the hole is little small. Many Kakurekumanomi are swimming in this tank. Their size is about 4 to 6 cm. You can watch them from inside of the tank. It is very beautiful and cute. These Kakurekumanomi are all bred here.

Each type of anemone fish has a different favorite type of sea anemone. Anemone fish have a special mucus membrane to protect from sea anemone poison.

Anemone fish have change the sex. The biggest anemone fish can become female and the other remain male.
