

General **D**escription of **P**rofessor Kobayashi ‘s **L**esson

We learn about theory of commons. In this lecture we will learn **about the** natural environment and human institutions for relations to understand viewpoints called commons. The commons is **an** organization **that** uses **joint** management **and the** arrangement **of the** natural environment.

Professor Kobayashi

Professor Kobayashi

Negotiates the order between **the** sea mingled with fresh water fishing ground users.

Class subjects

Environment and society

Design of the environmental symbiosis type society

Commons theory

Applied environmental synousiacs

Local investigation training

This section of **the description of our majors** was made by Yuichiro Kawaguchi, Ryoga Tanaka, Ryota Ishiyama and Keiya Nakahara.

In the lectures we see television pictures about the environment.
We summarize that about natural environment and human institutions.
We can know the system of commons.

Poland

In the video Poland, we learned about the relationship between wetlands and humans. For example, I think that it is a disaster that the water is overflowing, but Polish people think it is blessing of the earth. And Polish people take care of storks because they believe storks bring happiness.
I thought there is a big difference in thinking depending on the country.
